

Announcing World-Trak

Web based Global Freight Management Software

CSA Software announces the launch of its newly alunched web based software – **World-Trak**. World-Trak is the next generation of the very popular Air-Trak software application. In World-Trak, software development and technical architecture are all new – built from scratch, from the ground up. **World-Trak** incorporates the latest in recent technology advances.

Over time, the ways that freight management professionals do business have changed. Today's professional needs instant information and immediate Customer response. They also need to move shipments easily and quickly – using any available mode of transportation. Finally, they need software that handles both international and domestic in one package. **World-Trak** fulfills those needs.

World-Trak also includes an excellent interface with ACI that gives ACI subscribers up to the minute information on Pick Up and Delivery Agents, Zones and Pricing.

So, whether you are a Domestic or International Forwarder, Logistics Company, Air Courier Company or Expedited Ground Carrier; **World-Trak's** best in class software can benefit your business. Call or email us today: 734-953-5600 or sales@csasoftware.com
