

Press Release

For Immediate Release

CSA Software announces “best in class” web based global freight forwarding software.

Livonia, Michigan, March 16, 2008 – CSA Software, a division of Chuck Schubert & Associates, Inc. announces the release of **World-Trak** - its best of class, web based global software solution for Freight Forwarders and Logistics Companies., **World-Trak** was designed from ground up utilizing the latest web based technology in order to offer a state of the art solution enabling CSA’s customers to expand and enhance their domestic and global forwarding services. **World-Trak** provides an innovative tool to manage the information needed for international and domestic freight forwarding and logistics in one complete software application.

CSA Software, based in Livonia, MI, has been a leading provider of innovative domestic and international software solutions for the freight transportation and logistics industry since 1982. Its well known Air-Trak software product suite has been widely adopted by freight and logistics companies throughout the United States.

Chuck Schubert, CEO of **CSA Software** commented: “Since our inception, we have provided software solutions for the freight transportation and logistics industry. Our commitment to the industry drives us to continually re-invent our products utilizing the latest in technology and more importantly in customer feedback. **World-Trak** is the culmination of an effort to completely re-develop our products bringing the advantages of modern web based computing to our customers. Our customers need to be able to offer flexibility to their customers and partners more than ever before. **World-Trak** brings this to them through easy to deploy, user friendly, state of the art applications which bring a competitive advantage in the marketplace – now and in the future.
